

Commercial Performance Coatings

Envirocron® Powder Coatings

- **Manufactured by a world leader in powder coatings development**
- **Broad texture and effect capabilities**
- **New color decks feature the hottest color trends**
- **Local, responsive customer-focused service**
- **Quick ship program for select, high-volume colors**
- **Rapid response custom color service**
- **Local stocking available**

From the day PPG opened its first powder coatings plant in the mid-1980's, it has been committed to developing world-class quality and environmentally-responsible products. *Envirocron* powder coatings incorporate the latest technologies to offer a wide variety of chemistries, capable of ideally meeting your coatings needs. *Envirocron* powder coatings are manufactured to ISO and QS standards.

Envirocron® Powder Coatings

Wide Choice of Powder Coating Technologies

Epoxy Polyester Hybrids (PCF)

- Blend of epoxy and polyester resins, used primarily for indoor applications
- Corrosion resistant with improved penetration into corners and recesses (faraday cage areas)
- Less sensitive than traditional epoxies to overbake on curing
- Suitable for use on appliances, radiators, and other temperature-sensitive applications
- Available in a wide variety of colors and gloss levels

Epoxies (PCM)

- Ideal for applications requiring ultimate corrosion resistance, excellent chemical and mechanical properties, exceptional adhesion and the ability to meet demanding specifications
- Abrasion resistant, offers excellent hardness
- Can be tailored to suit specific applications such as long-term dielectric strength at high temperatures
- Not suitable for direct sunlight exposure

TGIC Polyesters (PCT)

- Durable, chemical and corrosion-resistant products with outstanding physical properties
- Can withstand prolonged outdoor exposure—often the coating of choice for lawn and garden products as well as other types of outdoor equipment
- Mar, chip, and overbake resistant
- Can be applied over a basecoat to enhance exterior performance
- Available in ultra-durable technology for demanding exterior exposure requirements
- Available in a wide range of colors and gloss levels

Urethanes (PCU)

- Combine outstanding thin-film appearance with excellent weatherability
- Superior chip, mar and scuff resistance at thicknesses as low as 1.5 mils making them competitive with high-quality liquid paints
- Adhesion to properly prepared ferrous and non-ferrous substrates is excellent, providing long-term resistance to humidity and salt spray
- Available in ultra-durable technology

PERFORMANCE COATINGS – Our newest powder coatings technologies

- XMR – Superior Mar/Scratch Resistance*
- XLC – Superior Low Temperature Cure*
- XHT – Superior Heat Resistance*
- XCR – Superior Chemical Resistance*
- XZR – Superior Corrosion Resistance*

**Individual sell sheets available*
