

# PPG Commercial Coatings

## Introduces MeasureColor Mobile™

*MeasureColor Mobile* is a color measurement solution consisting of a small device to capture surface color data and an app to view, share and manage workflow.

- Cloud-based, this B2B solution revolutionizes the color measurement process by enabling businesses to accurately scan surface colors, leverage mobility and deploy in hours at a fraction of traditional costs.
- Brand owners, suppliers and clients can select color preferences, measurement standards and communicate immediately across the globe.
- Equipped with full spectrum white LEDs and an accurate Tristimulus XYZ sensor, *MeasureColor Mobile*'s short term repeatability is less than .01  $\Delta E$ .

### Color Approval

Scan any surface color, search your color library, view the best options and recommend the perfect match.

1000's of color standards to choose from.

### Quality Control

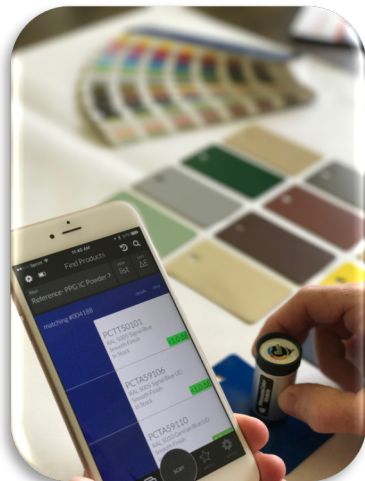

Create an inspection workflow based on your standards, images and measurement protocols.

Results are displayed in an easy to understand format, then stored for sharing or archival... your choice.

### Color & Appearance

Customize the app with your color targets, scan the item and you'll know immediately if the color is within your agreed upon tolerances.

- Pass/Fail
- CIE2000 Lab, sRGB, Hex and LCH
- d50 + d65
- Export results
